

MANUSCRIPT TEMPLATE FOR iCOPE 2023

Submission of manuscripts

Regular articles are full-length original empirical investigations, consisting of introduction, materials and methods, results and discussion, conclusions. Original work must provide references and an explanation on research findings that contain new and significant findings.

Generally, these are expected to be between 6 and 12 journal pages (excluding the abstract, references, tables and/or figures), a maximum of 80 references, and an abstract of 100–200 words.

Articles must be in **English** and they must be competently written and argued in clear and concise grammatical English. Contributors are strongly advised to have the manuscript checked by a colleague with ample experience in writing English manuscripts or a competent English language editor.

Linguistically hopeless manuscripts will be rejected straightaway (e.g., when the language is so poor that one cannot be sure of what the authors really mean). This process, taken by authors before submission, will greatly facilitate reviewing, and thus publication if the content is acceptable.

Empirical research is based on observed and measured phenomena and derives knowledge from actual experience rather than from theory or belief.

Key characteristics to look for:

- **Specific research questions** to be answered.
- Definition of the **population, behavior, or phenomena** being studied.
- Description of the **process** used to study this population or phenomena, including selection criteria, controls, and testing instruments (such as surveys).

-The manuscript template is provided in the next pages-

(Running Title)

(Page 1. Running title)

Abbreviated title of paper

(Times New Roman, 12pt., NOT more than 60 characters)

Example:

The full title:

*The Use of Code Switching by Second Semester Students of English
Department in xxx University*

The running title can be:

The Use of Code Switching by Second Semester Students

(Running Title)

(Page 2. Names of authors and corresponding authors)

FULL TITLE

<<Name of author 1*, Name of author 2, and so on>>

<<Author's and corresponding authors' institutions, full addresses,
institution's telephone including extension, authors' phone numbers, fax
number, e-mails>> (Times New Roman, 12pt., 1.5 line spacing)

*Corresponding author

(Page 3. Full title, abstract, keywords)

FULL TITLE

Abstract

Fill in this part with research abstract. Abstract should contain the aim of the study, research methods (data collection procedure, data analysis procedure) and research findings. Abstract should NOT be more than 250 words. Use Times New Roman, 12pt. and 1.5 line spacing. Following the abstract, keywords should be provided in alphabetical order to describe the contents of the research.

Keywords: keyword 1, keyword 2, keyword 3, etc. (NOT more than eight words)

(Page 4 and the rest of the pages)

INTRODUCTION

Fill in this section with the introduction of your research. This should contain the background of study supported by citations taken from books, newspapers, journal articles, internet, etc. Introduction also explains the scope and objective of the study which are related to current knowledge and issues. Use Times New Roman font type, 12pt in size and 1.5 line spacing.

LITERATURE REVIEW

Fill in this section with literature review consisting of a summary of key sources, usually has an organizational pattern and combines both summary and synthesis with specific conceptual categories. A summary is a recap of the important information of the source, but a synthesis is a re-organization, or a reshuffling, of that information in a way that informs how you are planning to investigate a research problem. The analytical features of a literature review might include to:

- Give a new interpretation of old material or combine new with old interpretations,
- Trace the intellectual progression of the field, including major debates,

Depending on the situation, evaluate the sources and advise the reader on the most pertinent or relevant research. Usually in the conclusion of a literature review, identify where gaps exist in how a problem has been researched to date. Use Times New Roman font type, 12pt in size and 1.5 line spacing.

MATERIALS AND METHODS

Fill in this section with materials and methods used in your research. Describe how the research is conducted by elaborating materials, participants, data collection procedure (e.g. sampling) and data analysis procedure. Use Times New Roman font type, 12pt. in size and 1.5 line spacing.

RESULTS AND DISCUSSIONS

Fill in this section by elaborating research results/findings along with the discussions. This generally contains the analysis on the collected data. The analysis may also be supported by equations, formulae, tables, figures and photograph, as well as any related citations from books, journal articles, newspaper, internet, etc. Use Times New Roman font type, 12pt. in size and 1.5 line spacing.

Equations and Formulae

These must be set up clearly and should be typed double spaced. Numbers identifying equations should be in square brackets and placed on the right margin of the text.

Tables

All tables should be prepared in a form consistent with recent issues of *Pertanika* and should be numbered consecutively with Roman numerals. Explanatory material should be given in the table legends and footnotes. Each table should be prepared on a new page, embedded in the manuscript.

When a manuscript is submitted for publication, tables must also be submitted separately as data - .doc, .rtf, Excel or PowerPoint files- because tables submitted as image data cannot be edited for publication and are usually in low-resolution.

Figures & Photographs

Submit an **original** figure or photograph. Line drawings must be clear, with high black and white contrast. Each figure or photograph should be prepared on a new page, embedded in the manuscript for reviewing to keep the file of the manuscript under 5 MB. These should be numbered consecutively with Roman numerals.

Figures or photographs must also be submitted separately as TIFF, JPEG, or Excel files- because figures or photographs submitted in low-resolution embedded in the manuscript cannot be accepted for publication. For electronic figures, create your figures using applications that are capable of preparing high resolution TIFF files. In general, we require **300 dpi** or higher resolution for **coloured and half-tone artwork**, and **1200 dpi or higher** for **line drawings** are required.

Failure to comply with these specifications will require new figures and delay in publication.

NOTE: Illustrations may be produced in colour at no extra cost at the discretion of the Publisher; the author could be charged Malaysian Ringgit 50 for each colour page.

General rules on Figures and Tables

- All Figures and Tables should be numbered sequentially (e.g. Table 1, Table 2 etc.) and cite each one in your writing as Table 1 or Figure 1.
- All tables should be referenced in the text of the paper and in the reference list.

Each table should have an individual title. Each word in the title should be italicized and capitalized except with, of, in, and, etc.

CONCLUSIONS

Fill in this section by stating your brief final conclusions drawn from the results and discussions. Use Times New Roman font type, 12pt. in size and 1.5 line spacing.

ACKNOWLEDGMENT

Individuals and entities that have provided essential support such as research grants and fellowships and other sources of funding should be acknowledged. Contributions that do not involve researching (clerical assistance or personal acknowledgements) should **not** appear in acknowledgements.

REFERENCES

Fill in this part with all references cited in your research. References should be in their own new page and be listed alphabetically based on first author's last name. Follow the **APA style referencing** (6th edition), use Times New Roman font type, 12pt., and double (2.0) spacing.
