

SUSTAINABILITY LEADERSHIP

PROGRAM 2024

bbs.binus.ac.id/exed

Background

In response to the pressing need for sustainability leadership in the Global world, the Sustainability Leadership Development Program has been meticulously designed. As sustainability takes center stage in global business, effective leadership in this context is paramount.

This program recognizes that sustainability leadership demands a unique skill set and mindset, equipping leaders to navigate sustainability challenges, align strategies with ethical sourcing, measure impact, foster innovation, engage stakeholders, and drive transformative change within organizations.

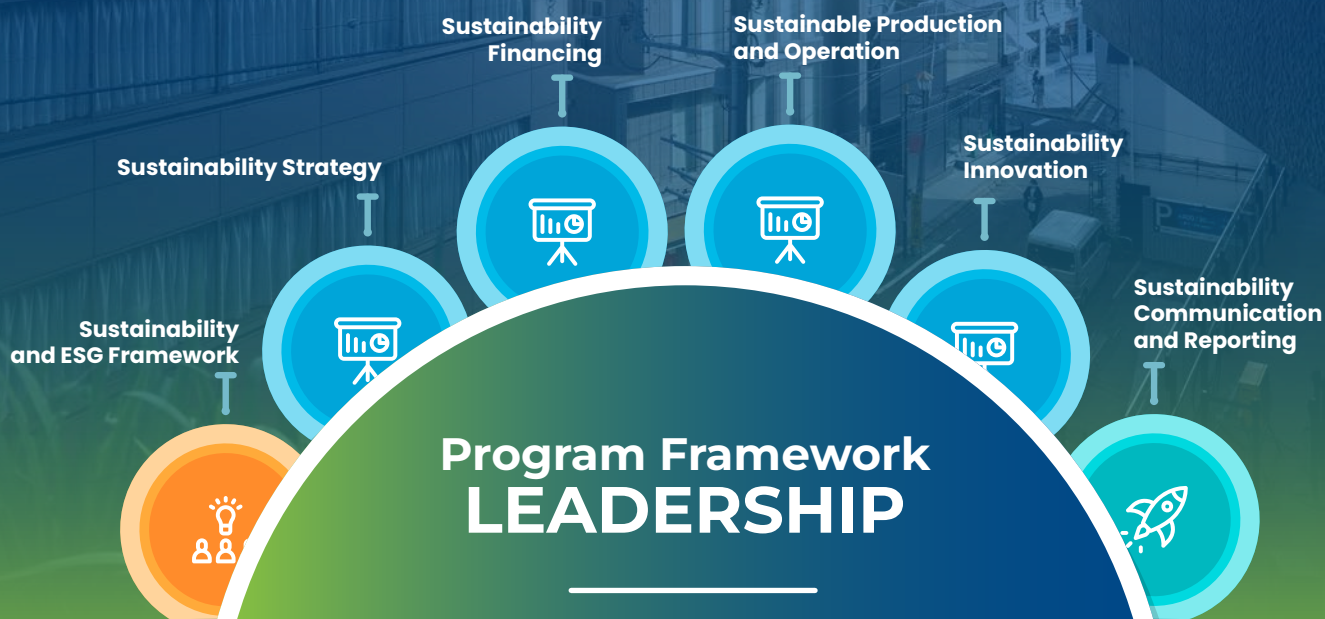

By nurturing sustainability-focused leaders, this program strives to catalyze a shift toward responsible and sustainable business practices, ensuring organizations thrive in a rapidly evolving global landscape.

Objectives

- Equip leaders with in-depth knowledge of sustainability concepts and trends.
- Develop leadership skills tailored to the challenges of sustainability.
- Integrate sustainability seamlessly into business strategies.
- Enable effective measurement and communication of sustainability impact.
- Foster innovation and circular economy practices.
- Enhance stakeholder engagement and communication.
- Empower leaders to drive sustainable change within their organizations.
- Translate learning into actionable sustainability plans.

Benefit

- Compact class size with intensive learning methodologies
- Convenient city campus location in central Jakarta
- Facilitators with global and executive experience
- Reputable executive education provider
- Hands-on case studies, workshops, group coaching, and final projects
- Strong networking opportunities.
